### DETAILED ACTION

This is in response to amendment filed on 11/15/04 in which claims 1-3, 5-12 and 14 are pending. The applicant's arguments have been fully considered therefore this case is in condition for allowance.

#### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: the prior arts of record fail to anticipate or render obvious the following recited features: at least a second frequency selection unit interfaced with said processor to look ahead at frequencies that are to be used in future time slots as recited in claims 1 and 12. Said master unit having a plurality of link state counters  $C(i,z)$ , wherein the condition of wireless links between the master unit and a slave unit are recorded in link state counters provided one for each frequency of communication-t between the master and the slave as recited in claims 5 and 8. The master unit constructs a link state history table of counters after receiving values of goodness counters  $GC(i,j)$  from all the slave units and uses this information during a next scheduling period, goodness counters  $GC(ié)$  are reset to zero by slave units after successfully transmitting their values to the master unit, and (9 the goodness counters  $GC(i,j)$  are allowed to count up to the maximum value and stay there until reset as recited in claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
